RETURN TO SCHOOL - HOW TO STAY SAFE

HANDS

WHAT'S THE SAME?

Wash or sanitise your hands regularly and always after touching your mask, using the toilet, before and after eating and after touching 'Frequent Touch Points'.
Remember the 20sec rule - sing 'Happy Birthday To You' twice.

Labels around school highlight points which will be touched by many people.
Always wash your hands after touching these areas.

WHAT'S NEW?

We strongly recommend that **you should always bring your own hand sanitiser to school.**
You should use your own hand sanitiser whenever you take your mask on and off - particularly in classrooms.

Regularly touching your masks should be avoided as this may help to spread the virus.

FACE

WHAT'S THE SAME?

If you travel by bus you should wear a mask.
You must wash or sanitise hands before and after touching your mask.

WHAT'S NEW?

It is strongly recommended by the government that masks should be **worn at all times when indoors.**
This now includes classrooms. There may be exceptions to this rule e.g. in PE.
Please bring a small sealable plastic bag to store your mask.
Always replace your mask if the one you are wearing becomes damp.

SPACE

WHAT'S THE SAME?

Try to walk, cycle or get a lift to school.
If using public buses, please keep a safe distance from others and remember you must wear a mask or face covering.

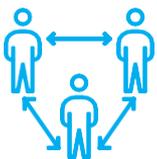

WHAT'S NEW?

If you use a school bus, keep a 2m distance from others when queuing and sit with your bubble and/or in your assigned seat during the journey.

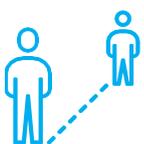

Please keep to the designated outside areas and your classroom bases.
Each Year Group has been split into two half-year bubbles.

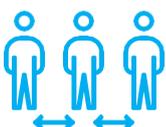

On your first day back in school, you will be asked to meet in class groups in your designated areas.

When indoors, try to mix mainly with people in your class groups and bubble.
When outside stay with people in your friendship group and remain 2m or more away from other groups.

Please take account of the signs on stairs and hazard tape in classrooms. You should still keep your distance from others in the outside areas for each year group.

Please use the matting and signs on the stairs and near toilets, as a reminder to keep your distance. When on corridors and stairs, please keep to the right.

Additional matting is in place near the Sports Hall to show you where to line up for the COVID tests when you first return to school.
